

TRAVERTINE

CARE INSTRUCTIONS

TRAVERTINE IS A NATURAL AND DELICATE MATERIAL AND NO TWO TRAVERTINE SURFACES ARE THE SAME, WHICH MEANS THAT THE DARKNESS AND STRUCTURE ON THE SURFACE CAN VARIATE. THE TABLE TOP HAS BEEN GIVEN A SURFACE TREATMENT BUT IT STILL NEEDS GOOD CARE AND MAINTENANCE. WE RECOMMEND YOU TO HANDLE THE NATURAL MATERIAL WITH CARE.

MAINTENANCE AND CARE

FOR DAILY CARE, WIPE OFF WITH A CLEAN, DAMP CLOTH FOLLOWED BY A DRY CLOTH OR SIMPLY DUST OFF THE SURFACE. DO NOT USE ANY CLEANING DETERGENTS OR OTHER CHEMICALS AS THESE CAN DISCOLOUR THE SURFACE. ALSO, WIPE UP SPILLS IMMEDIATELY TO AVOID LEAVING PERMANENT MARKS. PLEASE NOTE THAT ACIDIC LIQUIDS EASILY ETCH THE SURFACE. IF YOU SPILL WATER OR YOUR CUP LEAVES RING MARKS, USE IMMEDIATELY A DRY CLOTH AS WELL.

TRAVERTINE CAN REACT TO DAILY USE AND YOU SHOULD AVOID LEAVING VASES OR SHARP/HARD OBJECTS ON THE SAME SPOT FOR LONGER TIME AS THIS CAN DISCOLOUR OR LEAVE SCRATCHES. WE ADVISE YOU TO ATTACH FELT GLIDERS ON THE ITEMS YOU PLACE ON THE TRAVERTINE TOP.

CAUTION

DO NOT LEAVE WATER OR OTHER LIQUIDS ON TRAVERTINE SURFACES. WIPE AWAY IMMEDIATELY IN ORDER TO AVOID VISIBLE MARKS. THEREFORE, WE RECOMMEND YOU TO ALWAYS USE COASTERS TO PREVENT DIRECTLY CONTACT WITH LIQUIDS. NOTICE THAT TRAVERTINE IS VERY SENSITIVE TO ACIDICS SUCH AS TONIC WATER, RED WINE AND JUICES.
