

Lampin

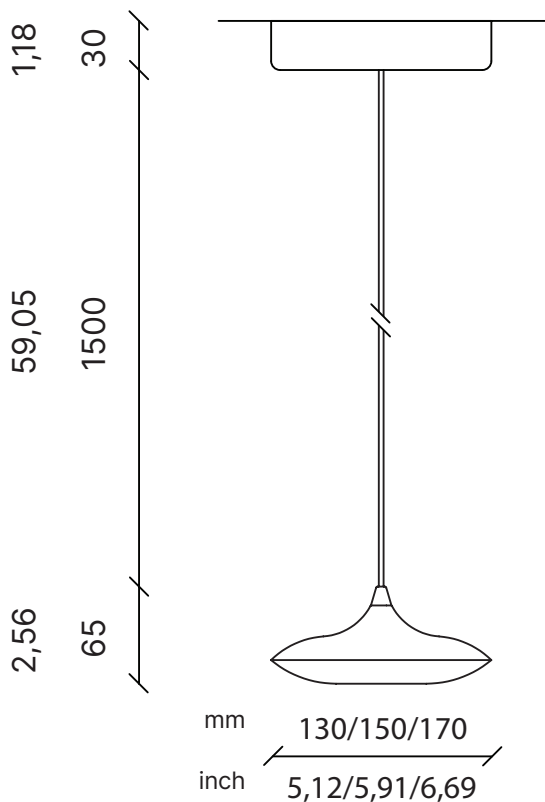

The LAMPIN concept is inspired by organic shapes and technological explorations. It is a subtle joiner of the FiDU manufacturing process and metal spinning, which provides its axially symmetric form. LAMPIN can perform as a single or multiple set of sleek, modern design pendant lightings. It adds a touch of weightless appearance in both residential and commercial spaces.

With a variety of options, a chosen colour temperature, size and composition, LAMPIN enriches each environment with an individual narrative.

inch mm

MATERIAL
stainless steel

CONTROL
CASAMBI

CCT
4000 K, 3000 K, 2700 K
CRI ≥ 90
R9 ≤ 60

LUMEN
4000 K: 422
